Product Overview

The Customer Visibility Assessment (CVA) application allows the VSOC to assess, manage, and report on customer threat visibility. Tracking data sources of Logs, Networks, and Hosts over time will show the maturity of our Raytheon Cyber security offering to customers.

Architecture

This application uses a Django API server and Angular user interface.

Login

Enter your Username and Password, then click the Sign In button.

If you forgot your password, you can click "Forgot Password". You will then be prompted with a message to use your Active Directory credentials.

If the Active Directory does not recognize your account, you will be unable to login. Please contact your IT administration.

You will be prompted for required field if any are missing.

After successfully signing in, the Overview screen will display.

Navigation

Primary Navigation

The primary navigation options are displayed after a successful sign in. The options displayed depend on the user's access rights.

User Menu

Clicking on the user's name will display the user menu. Users in the Administration group will see the 'Administration' menu option. The other menu options are available for all users.

User Guide

On any screen, you can download this user guide and save it to your computer in a PDF file format by choosing the User Guide dropdown menu option.

Administration

Users in the Administrator group have access to the Administration screens to manage user accounts. Click the 'Administration' option in the User Menu to display the Administration screen. See "[Administration Interface](#)" for instructions for Accounts.

General Interface

Reports Overview

Administration Interface

Accounts

User names and email addresses are maintained in the Active Directory. Click on a user's name to modify the group assignments. Drag and drop the groups to the appropriate columns.

Click the Update button to save the group assignments. If you wish to exit, click on the Cancel button or 'X' in the top right corner.

User Permissions

The actions for which a user can perform depends on the group or groups they are assigned to.

Signing Out

On any screen, you can sign out of the application by clicking on your username in the top right corner. In the dropdown User Menu, select "Sign Out".

You will have successfully signed out of the application.
